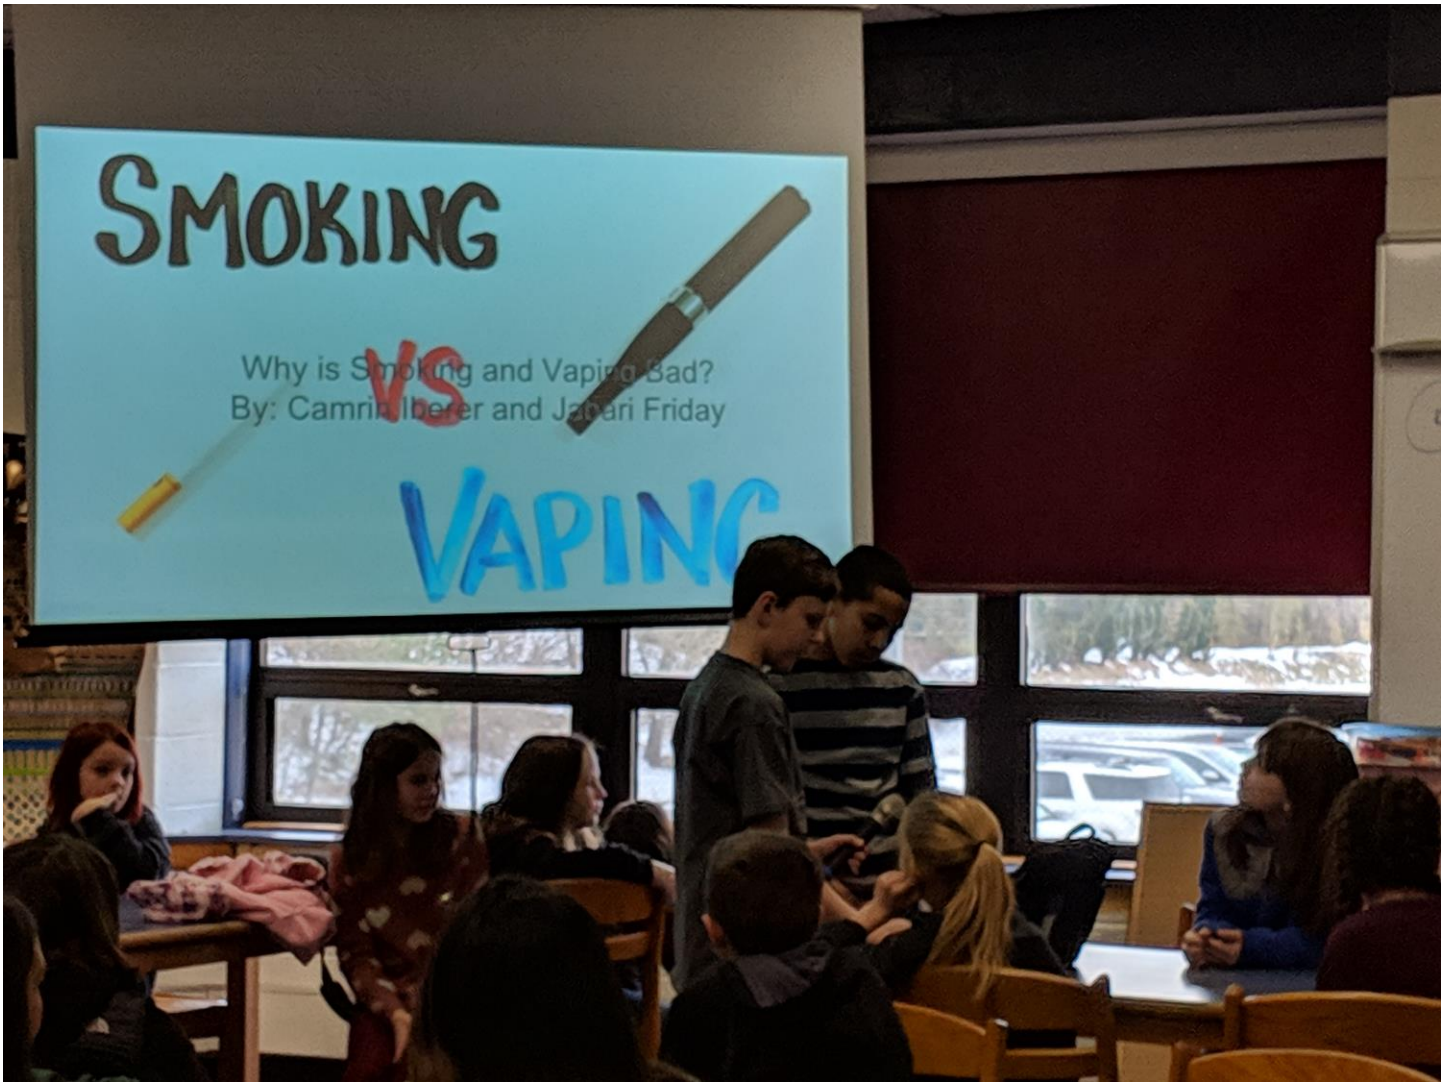
Title: **5th Grade ELA Class Presents to MS Staff and Students**

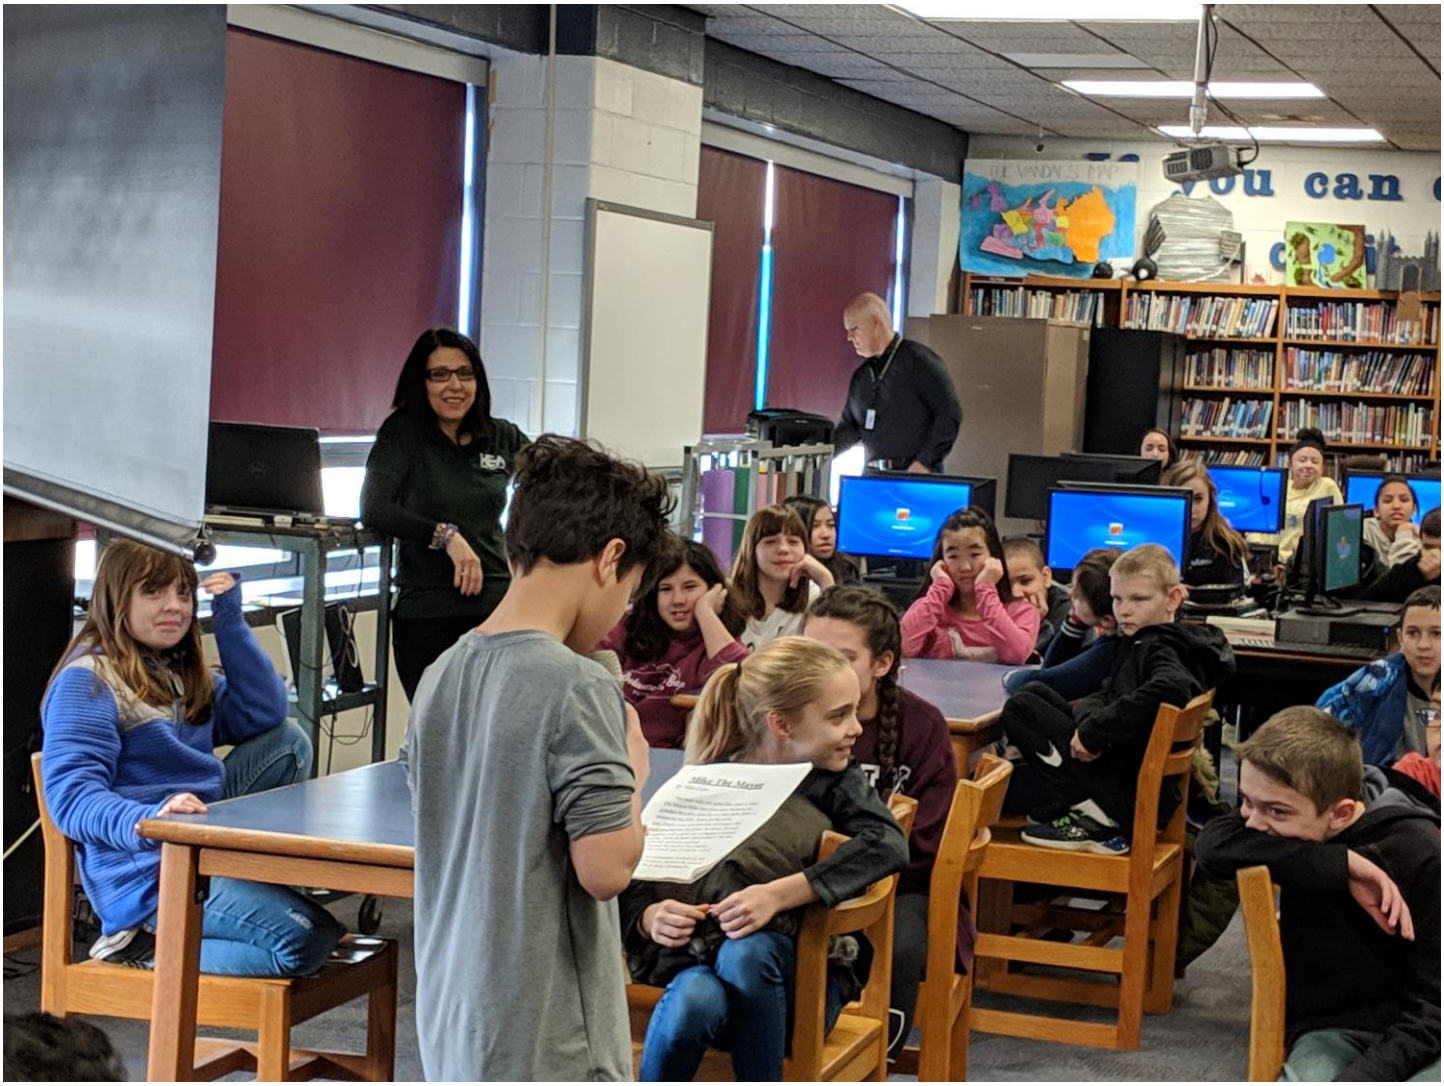
Art DiBenedetto, Hopatcong Superintendent of Schools, Announces-

Mrs. Concetta Spano's ELA 5th grade class completed research projects on topics of their choice that they found interesting and wanted to research further information on. Students worked in groups and collaborated together on all parts of the project. Students learned the foundations of good researching skills, and oral presentations skills. Furthermore, students learned the fundamentals of the writing process in order to produce clear, and concise power point slides. Students did an excellent job presenting. Thank you to the middle school staff and students who attended you were all such a wonderful audience. A huge thank you to Mr. Benfatti for giving these unique 5th graders the opportunity to share their projects.

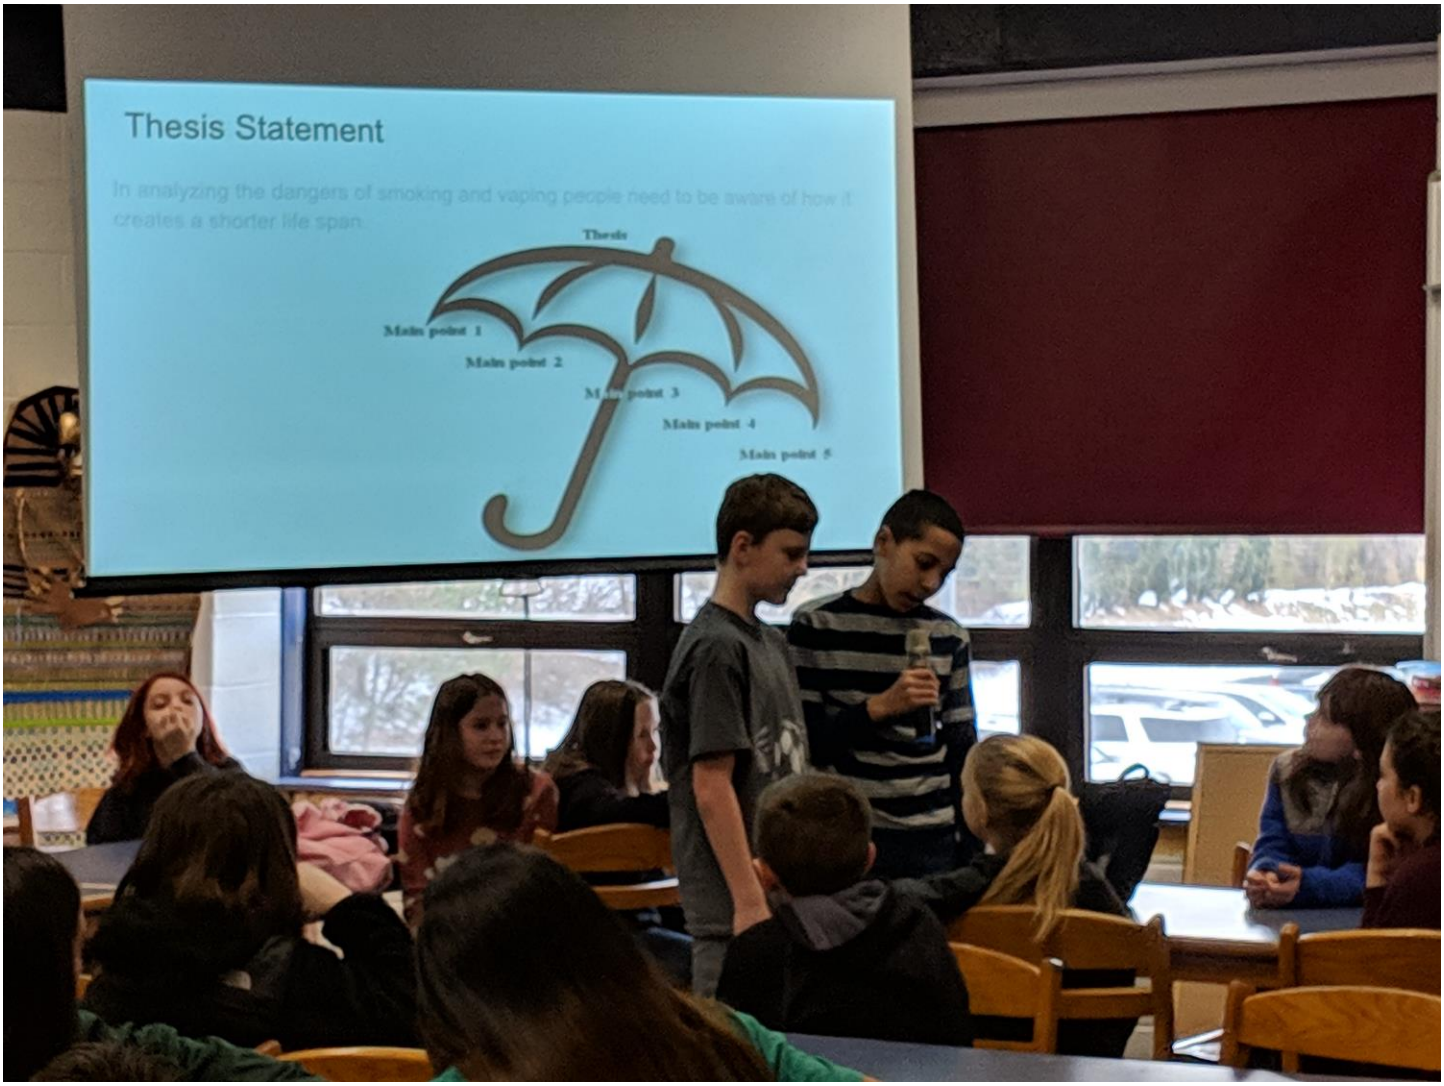


SMOKING
VS
VAPING

The Causes & Effects of
Alcohol



Mike The Mayor



Thesis Statement
In analyzing the dangers of smoking and vaping people need to be aware of how it creates a shorter life span.
